## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

DIVISION OF WATER QUALITY  
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection (the Department) intends to issue a generic TREATMENT WORKS APPROVAL (TWA) Number 02-3487-4SG, in accordance with N.J.A.C. 7:9A-3.9.

On August 5, 2002, N.J.A.C. 7:50 was amended to allow for an Alternative Design Treatment Systems Pilot Program. The purpose of that five-year program is to assess five different alternative technologies designed to reduce nitrogen loadings from septic systems. The Ashco RFS III system will be permitted for use on lots as small as 1.5 acres. The following four technologies will be permitted for use on lots as small as one acre: Amphidrome Sequencing Batch Reactors, AWT Environmental Trickling Filters, Bio-Microbics FAST, Cromoglass Sequencing Batch Reactors. Since these systems are outside the design specifications of N.J.A.C. 7:9A, they are required to obtain a TWA. The Department is issuing this generic TWA to facilitate the approval process so that the Pinelands Commission is given adequate time to complete its pilot program.

The Department is satisfied that these systems will function as well as or better than conventional onsite wastewater treatment and disposal systems. In addition, the Department is satisfied that the Pinelands pilot program will ensure adequate maintenance and inspection for these systems. Only those proposed projects under the jurisdiction of the Pinelands Commission are eligible for approval under this TWA.

The administrative record for the draft generic TWA is available for inspection at the offices of the Department, Bureau of Nonpoint Pollution Control (BNPC) at 401 East State Street, in the City of Trenton, Mercer County, New Jersey. It is available for inspection between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, by appointment. Questions regarding the TWA or appointments for inspection of the file may be scheduled by calling BNPC at (609)-633-7021 or (609) 292-0407. Copies of the administrative record may be obtained upon payment of the Department's normal charges for copies by contacting the Department.

Interested persons may submit written comments within 30 days of the date of this public notice to the following address: New Jersey Department of Environmental Protection, Division of Water Quality, Bureau of Nonpoint Pollution Control, P.O. Box 029, Trenton, NJ 008625-0029, Attn: Pinelands TWA.

All comments submitted during the comment period will be considered by the Department in making a final decision. The Department will respond to all significant and timely comments when a final decision is issued. The applicant, and each person who has submitted comments, will receive written notice of the Department's final decision.

General Permit- Category I2  NJPDES Permit No. NJ0108642  Ground Water	Statewide, NJ 00000 All Municipalities  Statewide County	June Gazek  Bureau of Nonpoint Pollution Control  (609) 633-7021	Statewide  II-A	This general NJPDES-Discharge to Ground Water (DGW) permit is being renewed with some changes. This permit applies specifically to active potable water treatment plant facilities who, as part of their treatment process, are removing excess iron and manganese which is frequently elevated in raw water supplies. The facilities who are eligible for this general permit treat their water as described above and discharge their filter backwash/clarifier water to on-site basins. The renewal permit proposes the following major changes: a consolidation of the 4 monitoring programs into 2 monitoring programs; changing the monitoring program frequency from semi-annual to annual. Most facilities will have a decrease in monitoring, except for those currently in monitoring program 3 who will sample annually for the trihalomethane compounds. Existing data collected over the previous 5 years suggests a wide variation needing further additional data for comparison.
